

# GEMINI

## Global expert management, invoicing and settlement

Insurers have historically lacked sight on how much they are spending on their experts annually. GEMINI was developed to illuminate this unknown spend and offer greater insight to the market. GEMINI is a global invoice and expert management tool which mutually serves insurers and experts.

### Single Global Solution

A single global management solution for your regularly used and approved experts, service and spend. Appointments are captured as part of the claims management process either within your claims management solution or via the Gemini portal.

### Faster Settlement for experts

A better, faster, cost-effective means of instructing experts, managing global invoices with a multi-currency payment facility. Expert management, reserves, budgets, fee payments are handled seamlessly. The total **invoicing cost is significantly reduced to £25.**

### Global Directory

An active and highly visible directory of the experts available to the market.

### Drive down costs

An integrated supply chain, risk, performance and expert management – allowing for cost savings, collective bargaining power and smarter decisions on claims expense and leakage.

### Carrier MI & Insights

Truly understand the cost and value of expert instructions & support decision making and reserving on new cases. Get insight into expert usage, performance and claims expense.

### Reduce Admin

Gemini accesses claims data from an Expert invoice to trigger the fee payment process on your behalf.

Born out of a requirement for the market GEMINI is now adopted by Lloyd's and the wider London market. Serving as a searchable repository for claims experts there is currently over 750 experts recorded within the system.
